#### 201 – Innovation Guide

Helps companies understand innovations inside, or on the peripherals of the automotive industry, and the companies spearheading those technologies.

202 - Monthly Start-up Tracker

Provides the latest news on interesting new start-ups, collaborations, investments, partnerships and acquisitions, as well as the top automotive events. #298

DATA

TOOLS

# AutoRoadmaps

AutoRoadmaps is a powerful tool designed to enable clear, confident, and fast responses to competitive questions in an increasingly complex and fast-changing market. Curated from tens of thousands of trusted and validated sources, it provides distilled intelligence data validated by human expert analysis in a normalized and actionable way, allowing you to save time, optimize products, uncover gaps, and align teams to create market confidence.

With 13 OEM groups and a minimum of 50 trends tracked each quarter, users can see the complete picture with 'signals' from thousands of sources that are compiled into a single location. These signals show more than 50 distinct automotive roadmaps and tech trends that, together, keep users up to date on what has changed in the last three months. At the same time, AutoRoadmaps also works to ensure that users are not over- (or under-) reacting to market announcements coming in from around the world. In addition to offering full trend market coverage for the USA, Europe and China, pre-signal coverage is provided for Japan and South Korea.

## Key questions answered

- 'Signals' from thousands of sources are compiled into a single location
- > Signals power > 50 distinct automotive roadmaps and tech trends
- > See what has changed in the last 3 months is your roadmap up to date
- AutoRoadmaps helps ensure users are not over- (or under-) reacting to a single market announcement

This powerful tool **enables confident**, **clear and fast responses to competitive questions** in a complex and fast-paced market.

#### The challenges

 Identifying trusted, up-to-date and reliable information sources is becoming more important as new information is being published faster than ever before.

#### Research pain-points

"Are we falling behind our competitors in 5G?"

 Distributed intel sources 100,000's of data points to read, analyze and accurately assess

#### Missing info

A single trend requires dedicated research, covering 'everything' is nearly impossible

#### • Conflicting signals

It's too easy to over- (or under-) react based on a single market announcement

#### Out-of-date information

Competitor positioning must be redone again and again (and again)

#### • Lack of trust

Strategic decisions require trusted sourcing of underlying data and assumptions

#### The breakthrough

Auto**Roadmaps** *solves* this challenge

#### Single reference point

'Signals' from thousands of sources are compiled into a single workbook

#### • Comprehensive coverage

Signals power 50+ distinct auto roadmaps and tech trends with more added as they emerge

#### • Common & clear definitions

Standard definitions of signals, roadmaps, trends, current status, and confidence level to act upon

#### Regularly updated

Updated each quarter to incorporate the latest Signals and the impact on OEM roadmaps

#### 100% traceability
